DETAILED ACTION

DETAILED ACTION

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-4, drawn to a compound of formula I.

Group II, claim(s) 5-11, drawn to a polymer and compositions comprising the said polymer.

Group III, claim(s) 12-13, drawn to to a method of treating a substrate with a surface treatment agent.

Group IV, claim(s) 14, drawn to a textile.

Group V, claim(s) 15, drawn to a carpet.

Group VI, claim(s) 16, drawn to a method of producing a compound within the scope of compound of formula I.

The inventions listed as Groups I-VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the technical feature linking the invention together is the fluorine-containing compound of formula (I). The said compound fails to meet the requirements of special technical feature because it has been disclosed in prior art by Ohmori et al (US 5,021,501, column 8, line 64).

Telephone election

During a telephone conversation with Abraham J. Rosner on 2/7/08 a provisional election was made without traverse to prosecute the invention of Group I, claims 1-4. Affirmation of this election must be made by applicant in replying to this Office action. Claims 5-16 withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Notice of Potential Rejoinder

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

- Claims 1 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Ohmori et al (US 5,021,501).

Ohmori et al disclose compound α Fi19F (column 8, line 63-64). The said compound meets the structural limitations of the fluorine containing compound of claims 1 and 4 when:

X = Fluorine

Y = -O-

p = 0

n = 2

Rf is perfluoroalkyl having 9 carbons.

- Claims 1, 2 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Ohmori et al (US 5,069,941).

In column 2, line 18, Ohmori et al disclose the following compound:

$\text{CH}_2=\text{CF}-\text{COOCH}_2\text{CH}_2\text{C}_6\text{F}_{13}$. The said compound meets all the structural limitations set forth in the instant claim 1, 2 and 4.

Art Unit: 1621

- Claims 1, 2 and 3 rejected under 35 U.S.C. 102(b) as being anticipated by Essers et al. (*Journal of Fluorine Chemistry* **2003**, 121(2), pp 163-170).

Essers et al disclose compound **2d** (Entry 4 in table 1 on page 164):

$\text{CH}_2=\text{CF}-\text{COOCH}_2\text{C}_2\text{F}_4\text{H}$. Compound 2d meets all the structural limitations of instant claims 1, 2 and 3.

Conclusion

Claims 1-16 are pending

Claims 5-16 are withdrawn

Claims 1-4 are rejected
